William Struve

747-206-8550 | wstruve.tech@gmail.com | linkedin.com/in/wstruve

Highly motivated fresh Computer Science graduate with a passion for software development. Looking for an entry level role where I can contribute to the success of a team and make a difference.

Education

University of California Riverside — Riverside, CA
Bachelor of Science in Computer Science — *Aug. 2020 – Aug. 2024*

Technical Skills

Languages: Python, Java, C/C++, JavaScript, HTML/CSS
Developer Tools: Git, Docker, Google Cloud Platform, Cursor, VS Code, IntelliJ, Eclipse
Libraries: Node, React, Flask, MaterialUI, Three.js, Tone.js, Pandas, NumPy, Matplotlib, Pytesseract, OpenCV, smtplib, Pytest, Gtest

Experience

Web Development Intern — May 2020 – Sep. 2021
Lepow International — *Walnut, CA*

- Streamlined user experience: Utilized WordPress and Elementor to design and develop responsive, user-friendly web pages, resulting in a 10% increase in conversion rates.
- Increased website traffic: Implemented SEO best practices and optimized website content, contributing to a 15% rise in organic traffic.
- Spearheaded an influencer marketing campaign, securing partnerships with techies like Andru Edwards

Jr Software Developer — Oct 2024 – Present
Kids and Teens Medical Group — *La Canada Flintridge, CA*

- Engineered custom API integrations between When I Work, Paylocity, and eClinicalWorks, automating data synchronization and reducing manual entry by 80%
- Led implementation of AI medical scribes and meeting transcription tools, decreasing documentation time by 45% and increasing provider satisfaction scores
- Developed AI-powered EMR template generator trained on physician-crafted templates, enabling on-demand creation of specialized documentation for any medical scenario in seconds while maintaining clinical accuracy and billing compliance

Projects

Travel Planner with Calendar | *C++, JS, Node, React, Firebase* — Jan. 2024 – Mar. 2024

- Collaborated with a team of six developers, primarily focusing on database design and front-end
- Built a system to suggest attractions, accommodations, and restaurants based on user preference
- Designed itinerary optimization tools to schedule activities efficiently.

Live Chatroom | *Node, Express, Mongoose, MongoDB, Passport, Handlebars* — May. 2024 – Jun. 2024

- Worked with partner to create a web based chatroom with server-side rendering
- Developed user created profiles tied to MongoDB using Google oAuth for registration
- Implemented real-time messaging, allowing synchronous deletion, edit, and search with React

MediCAL Billing Application | *Python, JS, Flask, OpenCV, Pytesseract, Pytest* — Jul. 2024 – Aug. 2024

- Lead development of Meta Scan, which automates MediCAL billing, exporting CSV/JSON files
- Implemented AI powered text recognition through Pytesseract to extract data from .jpg images
- Developed robust error handling, field/form validation, and testing to sanitize data
